

# **Tax Reform Council Meeting**

## **Macon State**

### **September 2, 2010**

1. Do away with state income tax- replace it with a sales tax.
2. Eliminate state estate tax if federal estate tax is eliminated.
3. Reduce/eliminate state licensing fees for professionals and recreation, etc. It's bothersome and generally doesn't help professional people.
4. Eliminate all taxes without a logical purpose. Maybe inventory, automobile, furnishings, etc.
5. Eliminate property taxes.
6. Eliminate special entrance allowances for foreign students at citizen supported state universities. Let's educate state of Georgia residents-their families paid the taxes that keep these universities solvent.
7. We spend way too much time abiding by useless regulations required by federal, state and local governments! Let's eliminate most all of them!
8. Give all parents who send their children to private/home schools a check similar to the amount it would cost to educate their children in government schools.
